ABOUT HOMESTEAD

VETERAN OWNED. MADE IN THE USA.

Built for the Land. Trusted by Those Who Work It.

Homestead Implements is a veteran-owned, American-made company based in Western New York. In our 179,000-square-foot facility, we engineer, cut, weld, powder-coat, and assemble every implement under one roof — ensuring the quality and durability our customers count on.

From day one, we've stayed true to what matters: hard work, American craftsmanship, and implements you can trust. That's why we proudly offer a 10% discount to active duty service members and military veterans—a small way to say thank you to those who've served.

Founded by lifelong tractor operator Lee Lodestro, Homestead Implements was created by and for people who work the land. As homesteaders ourselves, we design and test every attachment on our own properties to make sure it stands up to real-world use. If it's not tough enough for our fields, it's not going out the door.

Whether it's your first implement or your tenth, our lineup is built with the same care and attention to detail — because we know what it takes to get the job done. When you choose Homestead Implements, you're investing in equipment made by people who live the lifestyle and understand what you need to keep moving forward.

TYM®

KUBOTA®

KIOTI®

YANMAR®

Sticks Happen, Protect Your Tractor!

Protect your tractor with Homestead Implements' durable grill guards. Designed to shield your engine from debris and damage, these guards provide reliable front-end protection while maintaining airflow.

Grill Guards are available for select Kubota®, John Deere®, Kitoti®, TYM®, and Yanmar® tractors. Grill guards are available in the color shown for each brand and in black.

Hydraulic Coupler Size Chart

MEASUREMENT INSTRUCTIONS:

- 1.** Inspect and determine the type of fittings affixed to the end of the hoses attached to your 3rd function valve. Based on the images below, you should evaluate which coupler style you need from the three options: Flat Face, Ball, or Poppet.
- 2.** Based upon the fittings for your 3rd function, you will need the matching set for your hydraulic implement. If you have two male ball-style couplers, you will need two female ball-style couplers to match.
- 3.** Using a tape measurer or ruler, you must measure the top of the fittings to determine the body size required for your attachment fittings. Use the references below to assess which size coupler you need. If you do not see your size/dimensions listed below, please call our Sales Team at 833-625-0635 to inquire about the availability of other sizes or adapters.
- 4.** Homestead Implements only carry the below couplers as available options for all hydraulic equipment. Our standard fitting is a 1/2" Ball Style Coupler. Should you require a different style or size fitting, don't hesitate to contact your tractor dealer or visit your local tractor supply store to purchase the correct fittings to match your tractor. Homestead Implements will ship your hydraulic implement without fittings.
- 5.** If you are unsure which fittings your tractor requires, please get in touch with our Sales Team for assistance in measuring your couplers before placing your order. *(Coupler images shown are not true to size.)*

W.R. LONG THIRD FUNCTION KIT

W.R. Long Third Function Kit – Precision Hydraulic Control for Your Tractor.

Upgrade your tractor's capabilities with the W.R. Long Third Function Kit, designed for seamless operation of hydraulic attachments like grapples, snowplows, and more. This easy-to-install kit provides smooth, responsive control, allowing you to get the job done efficiently.

Key Features:

- Compatible with most loaders
- Allows independent control of hydraulic attachments
- Durable, high-quality components for long-lasting performance
- Easy installation with included wiring and joystick switch

Call us for a quote and take your tractor to the next level!
